DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawings are not legible. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

Specification

The specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

The following guidelines illustrate the preferred layout for the specification of a utility application. These guidelines are suggested for the applicant's use.

Arrangement of the Specification

As provided in 37 CFR 1.77(b), the specification of a utility application should include the following sections in order. Each of the lettered items should appear in upper case, without underlining or bold type, as a section heading. If no text follows the section heading, the phrase "Not Applicable" should follow the section heading:

- (a) TITLE OF THE INVENTION.
- (b) CROSS-REFERENCE TO RELATED APPLICATIONS.
- (c) STATEMENT REGARDING FEDERALLY SPONSORED RESEARCH OR DEVELOPMENT.
- (d) INCORPORATION-BY-REFERENCE OF MATERIAL SUBMITTED ON A COMPACT DISC (See 37 CFR 1.52(e)(5) and MPEP 608.05. Computer

Art Unit: 2634

program listings (37 CFR 1.96(c)), "Sequence Listings" (37 CFR 1.821(c)), and tables having more than 50 pages of text are permitted to be submitted on compact discs.) or

REFERENCE TO A "MICROFICHE APPENDIX" (See MPEP § 608.05(a).

"Microfiche Appendices" were accepted by the Office until March 1, 2001.)

(e) BACKGROUND OF THE INVENTION.

(1) Field of the Invention.

(2) Description of Related Art including information disclosed under 37 CFR 1.97 and 1.98.

(f) BRIEF SUMMARY OF THE INVENTION.

(g) BRIEF DESCRIPTION OF THE SEVERAL VIEWS OF THE DRAWING(S).

(h) DETAILED DESCRIPTION OF THE INVENTION.

(i) CLAIM OR CLAIMS (commencing on a separate sheet).

(j) ABSTRACT OF THE DISCLOSURE (commencing on a separate sheet).

(k) SEQUENCE LISTING (See MPEP § 2424 and 37 CFR 1.821-1.825. A "Sequence Listing" is required on paper if the application discloses a nucleotide or amino acid sequence as defined in 37 CFR 1.821(a) and if the required "Sequence Listing" is not submitted as an electronic document on compact disc).

Cross reference to related applications should be listed on the first paragraph of the specification. Applicant also reminded that to provide the application numbers for those incorporated references.

The attempt to incorporate subject matter into this application by reference to the application entitled Data Synchronization Across An Asynchronous Boundary Using, For Example Multi-phase Clocks is improper because said reference was filed after the filing date of current application. The incorporated reference did not exist when the current application was filed.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 29 and 30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 29 recites the limitation "The bi-directional bridge circuit as recited in claim 29" is indefinite because claim depend on itself. A claim must depend on previous claim.

Claim 30 is inherently rejected because of depend on rejected claim 29.

Double Patenting

Claims 2 and 18 – 21 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over allowed claims 11 and 18 – 21 respectively of U.S. Patent application 09989487. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the claimed limitations, such as first amplifier, second amplifier, common mode feedback differential amplifier, asymmetric differential amplifier, and controlling the symmetry, are found in both applications with different wording variations.

Claim 22, 25, 26, and 27 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claim 7, 13, 14, and 15 respectively of copending Application No. 09989580. Although the conflicting claims are not identical, they are not patentably distinct from each other because all the claimed limitations, such as first amplifier, second amplifier, common

mode feedback differential amplifier, asymmetric differential amplifier, and controlling the symmetry, are found in both applications with different wording variations.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Allowable Subject Matter

Claims 3 – 5 and 23 – 24, 28, and 31 – 32 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 1 and 17 are allowable over the prior art of record.
